## EXTRA CURRICULAR

### Community Moderator

Piano Planet

Volunteering at a startup called Piano Planet where I've been a part of the community moderator team.  
-Helped manage events for a community of over 4000 people.

### VentureX - SJCE

Innovator

Joined the Core Team of the entrepreneurship club of SJCE.  
-Helped plan, organize, campaign, and execute a 3-day workshop + 3-day hackathon for an Ed-Tech start-up.

## PROJECTS

Python Developer

### Supermarket Application

Worked on making a comprehensive supermarket application, including all aspects from checkout & billing (POS), inventory & stock management (Including restock warnings), employee details, pay and attendance management.  
-Coded in Python and interfaced with MySQL for Database management.

Python Developer

### Twitter Bot

-Built a Twitter Bot using the Twitter API 2.0 and the Tweepy Python library to implement functions to reply to a Twitter user.  
-Integrated with the OpenCV library for Computer Vision to detect faces in tweets and reply with an updated photo with recognised faces marked.  
-Learned the basics of how bots are ideated, programmed, and implemented.

Python Developer

### Black Jack Card Game

Recreated the card game "Blackjack" with one user playing against the computer.  
-This is one of the first projects where I extensively used OOP (Object Oriented Programming) to make the game possible.  
-It's a simple yet very fun and engaging game that I created as a milestone project for my Python Bootcamp course.
